

Managing Your Notifications

Stay connected without overwhelming your inbox.

Important: You do not need to unsubscribe from ACMCRN emails to reduce Community Group notifications. Group activity notifications and ACMCRN's regular organizational emails are managed separately.

Wix gives members several ways to control notifications. The settings you see can vary depending on whether you are using the ACMCRN website, email, or the Spaces by Wix mobile app.

1. Change Group Notifications on the ACMCRN Website

1. Sign in to your account at ACMCRN.org.
2. Open the ACMCRN Community Group you belong to.
3. Select the three dots (⋮) near the upper-right area of the group.
4. Select Notification Settings.
5. Choose Website, Email, or Mobile App to review the available notification options.

Website notifications can include activity such as new posts, comments, reactions, group updates, member requests, and new members. Turn individual options on or off based on what is useful to you.

2. Reduce Group Emails

From the group's Notification Settings, select Email. Wix will direct you to your account's Email notification settings.

Look for community-related options such as:

- New posts
- Comments on posts
- New posts from members you follow
- Weekly summary of posts
- Mentions
- Group status or activity updates

3. Keep ACMCRN Emails You Want

In Wix's Email notification settings, the Marketing emails section has its own Unsubscribe control. This is separate from the switches used for Community Group activity.

If your goal is simply to receive fewer Group notifications, adjust the Group/community notification options instead of using the general Unsubscribe button.

4. Spaces by Wix Mobile App

ACMCRN can also be accessed through the optional Spaces by Wix mobile app. The app provides convenient access to groups, events, blog posts, resources, and other community features from a phone or tablet.

The app has its own notification controls for mobile notifications. Because Wix may present these controls differently by device or app version, review the notification settings inside the Spaces by Wix app and choose the alerts you want to receive.

The mobile app is optional. You can always use the ACMCRN website instead.

A Note About Wix Settings

Wix provides ACMCRN's website, member accounts, Community Groups, and mobile-app features. Because Wix supports many different kinds of organizations and businesses, you may occasionally see account settings that ACMCRN does not use. For ACMCRN Community Groups, focus on settings related to posts, comments, summaries, mentions, group updates, and other community activity.

Need Help?

If you're having trouble changing your notification settings, please contact ACMCRN at contact@acmcrn.org. We're happy to help you stay connected while choosing the notifications that work best for you.

Quick Reference

What you want to change	Where to look	What to do
Website alerts	Group → : → Notification Settings → Website	Turn individual alerts on/off
Group emails	Group → : → Notification Settings → Email	Open account settings and adjust community email options
Mobile alerts	Spaces by Wix app	Review app notification preferences
ACMCRN organizational emails	Marketing emails	Keep subscribed if you still want ACMCRN updates
